

CSCI3033 Fall 18

Assignment 5 (5 points)

Due: Monday December 3rd, 2018, 11:30 AM

Assignment Rules:

This is a team assignment and students must collaborate with designated team members. Teams must submit this assignment as a printed document at the beginning of Monday's class on 12/03. Each team member must be present to receive credit. No late assignments will be accepted. No assignments will be accepted from individuals not working with a team already approved by the instructor.

Overview:

This assignment involves writing documentation for the team's Android project. The documentation should be professional and printed at presentation level quality.

Detailed Instructions:

User Documentation

- 1) Section 1 – “Application Title Page” should contain team name, list of team members, application title, project icon (image) and a summary description (paragraph) of the application. The list of team members should identify which project tasks were completed by each individual.
- 2) Section 2 – “Project Content Summary” should be a summary of the files of the Android team project. The summary should provide a quick reference listing of all project files along with their actual path within the project.
- 3) Section 3 – “Project Details” should provide screen shots of all project activities and detailed instructions on how to navigate through and/or use the application. This section should serve as user documentation.
- 4) Section 4 – “Project Plans” should provide a summary of future development plans and/or deployment plans for the application. This section should also detail any incomplete or non-functional areas of the project.

Bonus Points

- Section 5 should be added which provides detailed technical documentation for the project. This documentation should include source code pages for all custom java files and XML, along with detailed explanations for each code block.
